modal function

實作方式：

以連結的 a 方式來包裹 img src，在原有的圖片基礎上套用 modal function

```
<section class="section-gallery">
  <div class="gallery">
    <figure class="gallery-item">
      <a
        href="https://cdn.discordapp.com/attachments/861248486555779102/904976154300121128/line_303760595402716.jpg"
        class="big"
        rel="rel1"
      ></a>
    </figure>
    <figure class="gallery-item">
      <a
        href="https://cdn.discordapp.com/attachments/861248486555779102/904976154807656468/line_303743043236056.jpg"
        class="big"
        rel="rel1"
      ></a>
    </figure>
    <figure class="gallery-item">
      <a
        href="https://cdn.discordapp.com/attachments/861248486555779102/904976155143184394/line_303706803654142.jpg"
        class="big"
        rel="rel1"
      ></a>
    </figure>
    <figure class="gallery-item">
      <a
        href="https://cdn.discordapp.com/attachments/861248486555779102/904976155420000266/line_303686041817067.jpg"
        class="big"
        rel="rel1"
      ></a>
    </figure>
  </div>
</section>
```
