

1_active > w06-w3s-slideshow >  slideshow.scss > ...

```
1  * {
2    box-sizing: border-box;
3  }
4  .slideshow {
5    /* Slideshow container */
6 >  .slideshow-container { ...
64 }
65  /* The dots/bullets/indicators */
66 >  .dot { ...
78 }
79 >  .fade { ...
102 }
103 }
104
```

slide 中應有淡入淡出效果，若按照老師上課時所說的將整體合併到只剩下.slideshow-container 及.dot，則淡入淡出效果會消失，經測試後將.fade 獨立於外即可正常使淡入淡出效果維持
